The importance of ONE package

Driven by a deep understanding of the vital care you provide, Oncology Supply, an AmerisourceBergen company, accelerates access to the products, insights, technology and guidance you need to maximize practice performance and elevate your patient’s experience.

At Oncology Supply, we understand the importance of ONE package. After all, it’s not just for any patient, it’s for your patient.

Your Trusted Distribution Partner

Oncology Supply meticulously distributes chemotherapy, immunotherapy and supportive care products to community oncology practices nationwide from our office and distribution center in Dothan, Alabama. As your trusted supplier and solutions partner we go beyond the product, delivering the key knowledge that creates opportunities for growth, solutions that optimize critical areas of your practice and insights that lead to more informed decisions.

Since 1978, our mission has been to ensure our practices have the drugs they need every day to maintain their viability so they can continue to deliver excellent cancer care. Customer confidence is continuously earned through reliable deliveries by the most seasoned staff in the industry. You need to know that your distribution partner is always looking out for your best interest, this is why our stability in the marketplace matters. This stability has allowed us to continually understand your challenges and support your success with the utmost integrity. You can count on our vast experience, passion for customer satisfaction, empathetic and responsive service and persistent ingenuity.

What Sets Us Apart: Placing your patients at the heart of our business

Vast Experience

It’s taken time to become a trusted partner to our practices, but day by day we help them by cross-pollinating the extensive oncology practice insights that we gather from practice to practice. Together we have seen the changes through the years and have a deep understanding of the multitude and magnitude of challenges facing community oncology today.

Passion & Empathy

Our passionate associates serve with a high sense of urgency to exceed expectations. Every associate understands that there is a patient counting on us at the end of every order placed and they feel a personal sense of ownership in seeing through their part in that.

Persistent Ingenuity

From technology to process, our culture encourages unique and innovative ideas that can come from anywhere. We have a responsibility to look for every opportunity, big or small, to improve the future for the practices we serve. Continuous improvement is inherent in all that we do – whether it’s Nucleus® inventory management, distribution center, website, contracting or our internal processes.

We are united in our responsibility to create healthier futures.

Optimized Product Access

We have a responsibility to continuously improve, accelerate product access and optimize your purchasing power which is why we CHOOSE to be a full-service distributor. Provider and patient success depend on us as the front line of cancer care. We take a five-star approach to distribution, ensuring you have immediate and unparalleled access to the therapies your patients need most, when they need them, at the optimal and accurate price, leveraging the scale and reach of AmerisourceBergen.

Your call is answered by a person within 6 seconds

Every drug order arrives by priority shipping the next business day

Fully DSCSA compliant with easy track and trace on every dose

Thoughtful drug pack-outs to expedite practice check-in process

Supporting Viability of Community Oncology

With our extensive industry network experience, we have the knowledge, guidance, contracts and programs to empower your practice to succeed now and prepare for the challenges of tomorrow. Since 1998, we've partnered as the exclusive distributor for ION Solutions. Community-based oncologists rely on ION Solutions for creative GPO contracting and the expertise practices need to improve clinical and operational management. As a member, you have access to a versatile contract portfolio that consists of market share agreements, volume-based programs, data driven appropriate use opportunities and solutions that elevate your business performance. When you are part of the largest and longest standing aggregation of independent community oncology practices, all working as a cohesive unit, you maximize a collective purchasing power that is unrivaled in the industry.

#1 in contract performance

Elevate business performance

Advance the quality of care

Education and advocacy

Technology solutions that reinforce the business components of community oncology practices.

Your job can be difficult, balancing running a thriving business with providing excellent care. Our job is to support you.

Online Procurement & Distribution Support

Through the decades, Oncology Supply has shown itself to be a steadfast partner for practices. We understand the need for services and solutions that can help you make smart buying decisions, improve reimbursement efficiencies, reduce administrative burdens, improve performance, ensure regulatory compliance and have data readily available so you can make informed decisions in the face of change.

Oncologysupply.com: the Oncology Supply e-commerce platform. The simple online supply management tool for easy ordering, reporting, and invoice management. No matter the size or scope of your oncology practice, this site makes placing and managing your pharmaceutical orders simple with 24/7 access to the products you need. Use your desktop, tablet or mobile device to:

- Browse catalog/locate products
- Access real-time pricing online
- Place and track orders
- Access invoices past and present
- Pay bills electronically
- Run reports and analysis for procurement, finance and reconciliation
- Set reminders for discount buying opportunities to maintain the best price

Going Beyond Inventory Management: Improve efficiency and reduce carrying costs by leveraging Nucleus® at the center of your practice

Accuracy in tracking drug inventory is the first step in gaining financial and operational control of your practice. Nucleus inventory management system helps oncology practices across the country regain control of their pharmaceutical spend. Your needs are unique, the system is designed to offer optimal customization with oncology specific workflows and easy-to-use functionality.

Manage Inventory

Streamline practice workflows, easily view inventory levels and transient products between clinics across all stations

Purchase Orders

Total control of POs: reveal unused product, inventory not accounted for, how many days of inventory is kept in stock and automated restocking

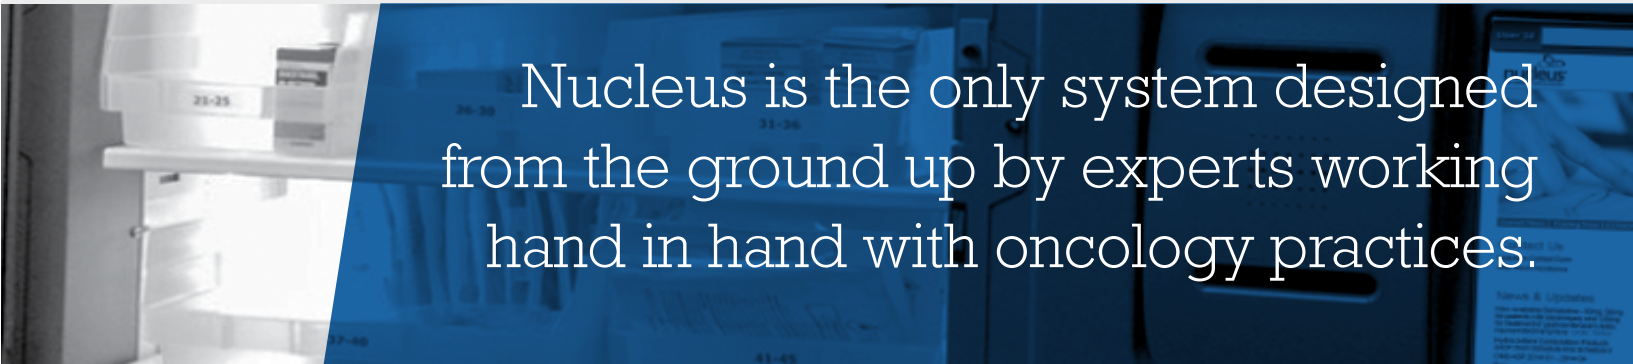

Business Analytics

Effectively reduce on-hand inventory and associated carrying costs while increasing billing accuracy

Streamline Workflow

Multiple dispensing options including Smart dispensing stations to improve clinical dispense workflows

Nucleus is the only system designed from the ground up by experts working hand in hand with oncology practices.
