

PRESENTATION

# How Texas Oncology has leveraged machine learning to unlock and increase capacity

ACCC 38th National Oncology Conference (Virtual)

INDUSTRY SHOWCASE

SPEAKER

Tammy Sayers, Chief of Operations, Texas Oncology

With consistent pressure to do more with less, and large time and cost barriers to increasing physical capacity, cancer centers must examine how to best utilize the resources they already have. Tammy Sayers, Chief of Operations at Texas Oncology, will be sharing how 20+ Texas Oncology locations were able to increase volume of daily scheduled appointments up to 20% while using existing resources with the help of iQueue for Infusion Centers.
